

### TL GEAR OILS

**ISO VG** : 32, 46, 68, 100, 150, 220, 320 & 460

**Performance Level** : IS 8406: 1993, Part – EP Type, DIN 51517

These are heavy duty energy efficient gear oils. These oils are high quality solvent refined mineral oils containing sulfur/ phosphorus additives imparting anti wear and extreme pressure property. These oils have high viscosity index, good oxidation and thermal stability. They provide excellent lubrication and protection against rust & corrosion. These oil provide good antifoam characteristics.

**Application:** These oils are recommended for the lubrication of all industrial enclosed gear drives operating at high load speed conditions.
