

TRIBO LUBES PVT LTD

Manufacturer of Grease & Specialty oils

TL QUENCHING OIL 80

Grade : 80

Performance Level : IS 2664/93

TL Quenching Oils are formulated exclusively from highly refined base stock and special additive. This oil is compounded with fatty oils. It offers longer bath life at elevated temperatures. The oil contains rust inhibitors, wetting agents that alter surface tensions and aid cooling during the vapor phase to achieve specific quenching characteristics.

Application: TL Quenching Oils suitable for use at bath temperatures up to 80°C. Compounded quenching oils are used to provide good proportion of hardness and toughness and offer least warpage with standard steels.

<u>Sr. No.</u>	<u>Characteristics</u>	<u>TL QUENCHING OIL 80</u>
1	Appearance	Bright & Clear
2	Flash Point, COC°C min	182 - 190
3	Pour Point °C max	-3
4	Copper corrosion test	1
5	K.V. cSt @ 40 °C min	22-26
6	VI	96 TO 100

Note: The above mentioned data are typical and it may vary with batch to batch within Permissible specification limits.
